

Product Description

BioLab Fluid Flow™ is an amniotic liquid allograft derived from the amniotic liquid within the placenta to advance soft tissue repair, replacement, and reconstruction.

Relevant Conditions

- Sports Injuries
- Joint pain
- Tendonitis
- Fasciitis
- Muscle & Meniscus tears
- Wound Care

Donor/Tissue Screening

The donor has been assessed for high risk behavior and relevant diseases. The donated tissue has been deemed acceptable for transplant in accordance with strict industry standards. All BioLab Sciences amniotic liquid allografts have been tested for potentially infectious diseases and terminally sterilized to ensure the safety of each liquid allograft.

Fluid Flow™

amniotic liquid allograft

BioLab Fluid Flow™ Product Benefits

Ready to use

BioLab Fluid Flow™ is provided in a vial as a ready to use flowable graft, with no thawing or prep required.

Room Temperature

BioLab Fluid Flow™ is stored at room temperature (50-86°F/10-30°C) until ready for use. Product has a 1 year shelf-life.

Easy to Apply

BioLab Fluid Flow™ is provided in an easy to apply flowable form, for precise delivery throughout the intended site.
